

Turn your dreams into reality

Integrated & Modular Airline Pilot Training

Aim higher.

Pilot training with an edge.

Leading Edge Aviation

Welcome to Leading Edge Aviation, where we are committed to making your dream of becoming a pilot a reality.

Our Integrated (LEAP) and Modular (MAP) courses, accredited by UK CAA, EASA or dual UK CAA & EASA, all result in achieving your 'frozen' ATPL – the essential qualification for becoming an Airline Pilot.

We train with the highest standards, using technology to its fullest at our state-of-the-art campuses in Oxford, UK and Alhama, Murcia, southern Spain. Experience the best of both worlds as you immerse yourself in an environment tailored to cultivate success.

You'll find a home away from home in our modern, high quality accommodation, providing a supportive environment for students and conveniently located near our world-class facilities.

Whether you choose LEAP or MAP, our dedicated team of instructors will be with you every step of the way, delivering advanced theoretical knowledge and technical training. We pride ourselves on our unique blended learning approach, incorporating core pilot competencies throughout our courses to ensure comprehensive and effective training.

With a focus on wellbeing, our students always come first and have access to a rich programme of support. Whether its time with our student mentors or learning about hydration and nutrition, we always ensure students are well rested and ready to learn!

Let your dreams take flight with Leading Edge Aviation.

Integrated or Modular?

Whether you would like to study our integrated LEAP course, where you can achieve your fATPL in just 18 months, or you want to follow a more flexible modular route to the flight deck that allows you to train around your existing commitments, we have a course for you! Or, if you have already begun a degree in Aviation Management with Pilot Training with one of our partner universities, our uMAP course provides the perfect complement for the ATPL elements of your degree. It's your choice!

Modular Pilot Training (MAP)

The flexible nature of the modular route allows you to 'earn as you learn' and can be completed more easily alongside existing work, family, or other commitments. Our modular pricing structure is simple and transparent, making budgeting for commercial pilot training easier. With MAP, you get the flexibility of a modular course with all the benefits of training with Leading Edge Aviation.

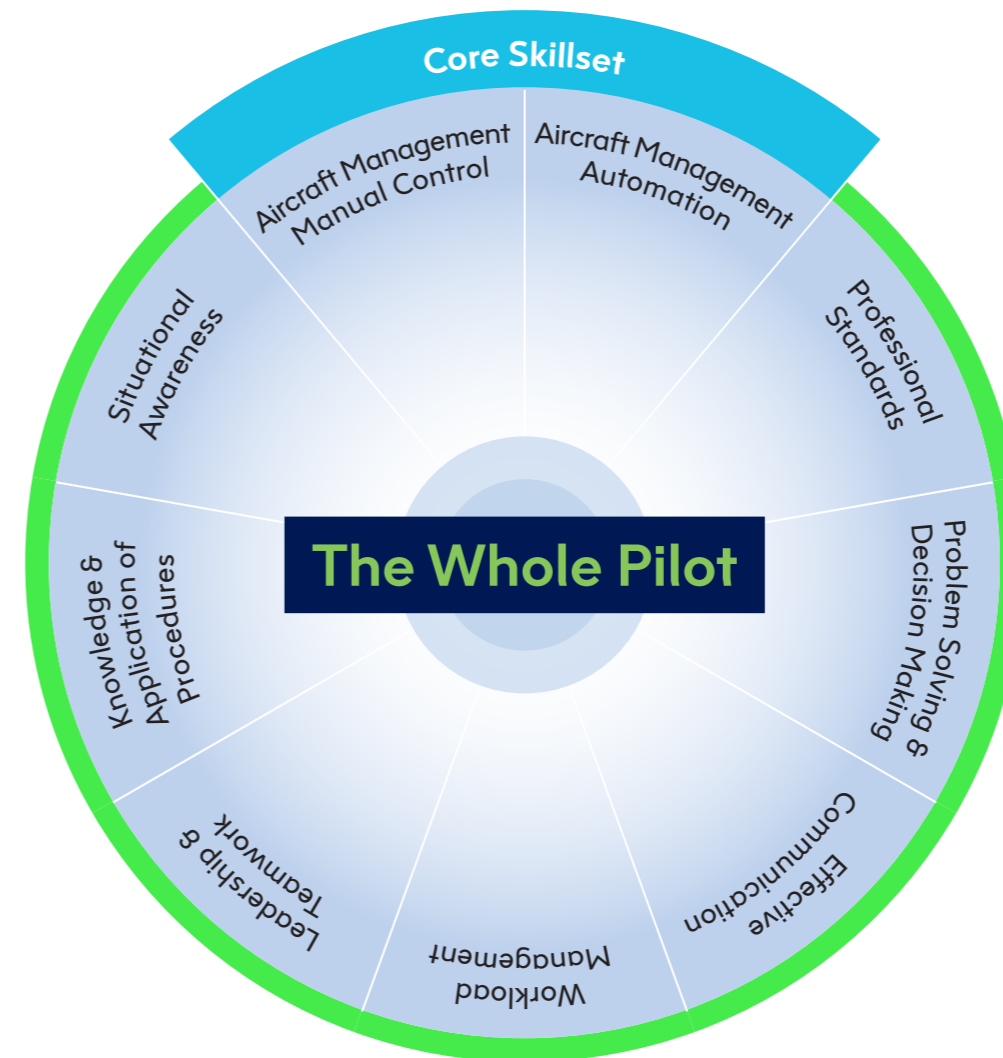

University Modular Pilot Training (uMAP)

Designed to fit perfectly with your university degree course, uMAP takes you from PPL to FATPL, complementing your existing studies. We work alongside your university to deliver the commercial flight training elements of your degree, giving you consistency of training with access to all our facilities and 'future captain' ethos.

The Whole Pilot Approach

Creating Future Captains

We believe in going above and beyond the two core Aircraft Management competencies to train the 'whole pilot'. Beyond the basic flight training offered by other flight schools, Leading Edge provides an all-round learning environment for future captains by incorporating the additional competencies required to become a successful pilot.

Take the First Step Towards Your Dream Career

Choosing the right flight training organisation is a big decision to make, that's why we always encourage prospective students to come and visit us at our Oxford campus. We'd love to show you around our amazing facilities and help you discover the Leading Edge difference for yourself.

You can get in touch with us at any time and we will be glad to answer any questions you have about our training and how to get started. Here's a quick summary of how to get your journey to becoming a pilot started.

STEP 1 Visit our academy

Don't take our word for it, come and see for yourself how great our facilities, technology and people are! Our Open Days run each month and are a great way to see everything, talk to our staff and students as well as get a taste of flight training in one of our simulators.

STEP 3 Sit your skills assessment & apply

If you are looking to study our LEAP integrated course, you'll need to sit our Skills Assessment. For our Modular course we have an application process – but for all routes you'll also need your Class 1 medical before you start (and a dual medical if you are following a dual licence pathway).

STEP 5 Training at Leading Edge Aviation

From day one you'll be immersed in our academy life. Whether you are joining us at the beginning for Ground School or a little later for Flight Training, your journey will begin with a full induction with our enthusiastic and supportive team.

STEP 2 Choose your training pathway

You may already know which pathway you would like to follow and, if not, our Training Advisors can help you decide which option is best for you. We offer Integrated and Modular pathways; all you need to do is choose!

STEP 4 Sign up and begin your training

Once you have passed your assessment or application, you will be offered a place on one of our courses and given your Training agreement. Now it's time to prepare to join us, why not look at our Student Budget Case Study on our website?

STEP 6 Graduate services & airline applications

As you come to the end of your training with Leading Edge Aviation, there's one last course to complete, Graduate Services course! Working with current airline pilots, we'll take you through everything you need to do to land your all-important role as a First Officer!

Book your seat to
our next Open Day!

Why Choose Leading Edge Aviation?

At Leading Edge, our people are the key to exceptional pilot training. Our dedicated team helps you succeed on your path to becoming a pilot, constantly evolving our training and technology for an enhanced experience.

We prioritise wellbeing, fostering a supportive environment and offering a blended learning approach to prepare you for a future captain role.

Choose Leading Edge Aviation for an unparalleled pilot training experience, where your success is our top priority. With our student-first approach, cutting-edge facilities, and exceptional team, you'll have everything you need to turn your dreams into reality.

Our world-class campuses and student-first philosophy make us an unrivalled choice for pilot training. We take pride in our graduates' success, committed to helping you secure a First Officer role with leading airlines, we'll support you every step of the way until you achieve your goal.

Follow in the footsteps of our graduates who have secured roles with the airlines featured here.
